| How do I... | How do I make a multi-column page? |
| Answer | <p>There are two ways to modify the layout of a Confluence page. You can:</p> <ul style="list-style-type: none">• Use Page Layouts to add sections and columns, or• Use the Section and Column macros to add sections and columns. <p>Page layouts provides a simple, visual representation of your page layout in the editor, while the macros are more flexible and allow for greater complexity in your layout.</p> <p>More information is available on the Atlassian web site's Working with Page Layouts and Columns and Sections article.</p> |
