Source(s)

Abstract

This document specifies the YANG modules for [MEF 6.2 EVC based Services](#) and [MEF 10.3 Ethernet Services Attributes](#). These modules are for use in Service Orchestration Function (SOF) and to communicate the configuration state for Service attributes and values with other entities, such as Business Applications or Partners or Customers, specified in [MEF 55 Lifecycle Service Orchestration Reference Architecture](#). One use of these modules is for the use cases at Legato reference point for Service Configuration and Activation (SCA) specified in [MEF 56 SCA \(Legato\) Interface Profile](#) specification. The elements of the YANG modules are aligned with the objects identified in [MEF 7.3 Carrier Ethernet Service Information Model](#).
