Graphics Repository

Welcome to the ***Graphics Repository***. This area is used by the MEF Reference Wiki as well as the Presentation Development Tools section of the MEF Wiki.

Graphics are images depicting diagrams for various technical elements within the purview of the MEF as well as graphical elements used in varied MEF content. They are separate from icons, though many graphics (in particular diagrams) are made using MEF icons. Graphics are stored as PNG files such that size and colors are fixed.
