

MEF 35.1 - Service OAM Performance Monitoring

MEF 35.1 is a specification document developed by the [Technical Committee](#) of the MEF to provide an Implementation Agreement for **Service OAM Performance Monitoring**.

Abstract:

"This document specifies an Implementation Agreement (IA) for Service Operations, Administration, and Maintenance (SOAM) that satisfies and extends the Performance Monitoring (PM) framework and requirements described in MEF 17. Existing PM Functions are defined by ITU-T G.8013/Y.1731 [1], and ITU-T G.8021 [3] as amended. This document details how to use these functions in order to achieve the requirements of MEF SOAM PM."
