

MEF 62 - Managed Access E-Line

Abstract This Implementation Agreement (IA) defines an Access E-Line Service that includes a specific set of management and Class of Service capabilities. The service defined in this IA is based on applicable functionality and associated requirements from existing MEF specifications, including:

- Access E-Line Services, as defined in [MEF 51](#)
- Key Service Attributes not covered in [MEF 51](#), as specified in [MEF 26.2](#)
- General SOAM and SOAM Fault Management, as specified in [MEF 30.1](#)
- SOAM Performance Monitoring, as specified in [MEF 35.1](#)
- Latching Loopback, as specified in [MEF 46](#)
