MEF Reference Specifications

MEF 49.0.1 is an amendment to [MEF 49](#).

This amendment makes the following changes to MEF 49:

- *Update to Table 9 to correct a typo for SubType Value 8.*
- *Update to Table 10 to indicate that an option exists to specify the Destination MAC Address in the Forward direction for a Bandwidth Test.*
- *Update to section 10.4.2.17 to clarify that the Rate Type TLV can be used for bandwidth and frame delivery tests.*
